

Men's March Madness Tournament 2022 ML Project

Group: Spencer Duncan & Geoff Johnson

Project: <https://www.kaggle.com/c/mens-march-mania-2022>

Goals: We want to get to the point where we can have our ML algorithm take the teams from this year's tournament and make predictions using the historical data to predict the winners in each round. To do this we will use the data to predict the results of last year's tournament games as we won't have access to this year's results until after the quarter ends.
